

I drive a semi truck and go all over U.S.and Canada.I find this rather odd that the powers that be would wish to stop a benafit to society (and themselves).I see the homeland security threat rising as well as the fuel prices which intern rises the cost of everything else.Obviouslythere are financial matters behind this petition.But why should we the consumer and/or provider do without this useful service that we already pay for?

Yours Truly an overconcerned Patriot.
